DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-20 and 24-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Sacristan (US3,894,542).

Sacristan discloses the crotch possessing corrective garment with the tightening portion 7 wherein the material used to construct the tightening portions has a force lower than in the direction orthogonal thereto. The shape of the tightening portion is configured as claimed in addition to that of the supplementary front tightening portion 4 which is also configured as claimed. See Sacristan, figures 1-3 and col. 1, line 14 – 40). The garment includes thigh portions as broadly claimed. Applicants specific band structure which extends along the side of the thigh has not been claimed over the Sacristan reference. The Sacristan garment is a girdle as claimed.

Claims 23-23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. None of the cited references disclose the warp knitted structure as claimed.
